About ACoolToy

ACoolToy™, an established name in toys in North America, is one of the leaders in market share growth in past years. With an emphasis on safety, entertainment, and cultural relevance, ACoolToy™ delivers educational value and intellectual development while at offering and fostering in creativity and imagination. In order to ensure product quality and safety, ACoolToy™ applies a rigorous certification process to not only its manufacturers, but the entire production chain, from the sourcing of raw materials to the distribution into the market.

ACoolToy™'s Managements, product designers and marketing experts are all internationally renowned professionals, who have more than one hundred years of combined experience. Children's safety is always FIRST to ACoolToy™. We strive for the most efficient production practices and work under the principle of delivering happiness and stimulating childhood development.

Every measurement of our products is exactly specified, and every corner on the toys is finely smoothed and polished. Professionalism and dedication to its products are what make ACoolToy™ outstanding in the market. Together, we strive to make ACoolToy™ a trusted brand, which our customers will never regret choosing.

ACoolToy™ integrates tradition and modernity, education and entertainment, tradition and innovation. Our products are the best and closest buddy of children during their growth. ACoolToy™'s entire product process, from concept design to production and marketing, is run by elite teams of specialists, including childhood development and education specialists, graphic designers, product engineers, prototyping divisions, production technology divisions, and sales team, among other professionals. Our team is growing and we are recruiting nationwide. We would love to hear from you.

ACoolToy™ Is making every effort to bring happiness to children. Happiness is our dream; it is what drives us. Expect ACoolToy™ to bring joy to more children.

Xinyun Wood Industry Group Co. Ltd., a leader in wooden toy industry in China, even in the world, is not only the OEM of ACoolToy™, but also is the manufacturer for many well-known toy brands. It has extensive experience in manufacturing. To achieve strict quality control, Xinyun invested millions of US dollars to setup a facility which has advanced physical and chemical detection instruments and equipments. Xinyun is the only toy manufacturer in China who has the ability to perform comprehensive physical and chemical tests on their products. Yi Cheng Trading Company is the sales & marketing division of Xinyun Wood Industry Group Co. Ltd.. It has a full range of sales channels, which includes distribution channels and online stores.

Verbal-linguistic intelligence

Musical-rhythmic intelligence

Logical-mathematical intelligence

Visual-spatial intelligence

Bodily-kinesthetic intelligence

Intrapersonal intelligence

Interpersonal intelligence

Naturalist intelligence

Verbal-linguistic intelligence refers to the ability of listening, speaking, reading and talking. It manifested by individual abilities to describe events, express ideas and make cognitive communication smoothly and efficiently.

Musical-rhythmic intelligence refers to the ability of feelings, identify, memory, change and music expression. It manifested by personal sensitivity to rhythm, tone, sound and individual abilities to music expression by composing, playing and singing.

Logical-mathematical intelligence refers to the ability of calculation and logical inference. It manifested by personal sensitivity to the analogy, comparative causal and logical relations between different things and thinking capacity through mathematical operation and logical inference.

Visual-spatial intelligence refers to the ability of feeling, identifying and changing object's spatial relations and the ability of express ideas and feelings by this mean. It manifested by sensitive to line, shape, structure, color and spatial relationships, and able to express them by plane figure and the three-dimensional modeling.

Bodily-kinesthetic intelligence refers to the ability of using limbs and torso. It manifested by good control on body, and appropriate reaction on events and good at expressing ideas and feelings by body.

Intrapersonal intelligence refers to the ability of recognize, insight and self-examination. It manifested by correct consciousness and self-evaluation on emotion, motivation, personality, will and desire, then becoming self-esteem, self-discipline and self-control.

Interpersonal intelligence refers to the ability of getting along and communicating with others. It manifested by awareness and experience on others emotion, feelings and intention, and appropriate reaction capacity to them.

Naturalist intelligence refers to the ability of individual ability to identify environment characteristics (not only including natural environment, but also including man-created environment) and make classification and utilization on them.

Activity Toys

Raw Material Control

We use non-toxic and odorless eco-friendly coating, glue and pigment on products. Before put into production, they will be test qualified by professional organization to ensure its safety to human body. All of the raw materials we used confirms to EN-71 standard in EU and ASTM in USA and FSC forest regulatory system.

Safety Control

To better control the toys safety, Xinyun Group invested hundreds of millions money to establish independent chemical and physical laboratory and purchased heavy metal detector and physical safety testing equipments for the lab. The laboratory enable us to make immediate testing and regular inspection conveniently and quickly, which provide more guarantee for toys security. Our company is the sole enterprise who can make chemical detection.

For new developed products, the lab will conduct its own test and make test report. The new products won't put into production until it pass the test.

On coating, glue and pigment supply, we will take sample inspection before purchasing, and will conduct regular examination to ensure the materials are safe and non-toxic.

Regarding physical safety, the lab also equipped with physical testing appliances for the products in production. We company also provide training to designers, engineers and production personnel, so that they have a clear mind on toys safety knowledge and ensure products security from the beginning of research and development.

Quality Assurance

Toy is small, but the process is various, even each process is a test to the quality. Only excellent quality can ensure the competitiveness of the products. Xinyun has a pervasive slogan "Product quality is the lifeline of an enterprise". More than a decade, Xinyun not only relies on continuously advanced equipment, but also depends on scientific effective management and strict quality management system. Rejecting defective products and delayed delivery bring 100% contract fulfillment rate for many years.

Material Selection

We select birch wood from Da Hinggan Ling in the northeast of China, Europe beech wood, Thailand rubber wood, New Zealand pine wood, birch wood in Zhejiang Province. All of the wood with delicate texture, smooth colors, moderate hardness and insect-resistant are considered as superior materials for wooden toys. With special treatment, it can reduce products deformation degree and microbial violation.

Strive for excellence

In actual production, we keep eliminating cracks and initiation angles, inspecting production fastness, treating sharp edges and corners with rounder corner process to ensure its high security.

A wooden pirate train set (AC7535) featuring a large pirate ship, a train, and various accessories like a treasure chest, a pirate, and a shark. The set includes a wooden track with a bridge, a pirate ship with a skull and crossbones, a train with a red engine and black cars, a pirate figure, a treasure chest, a shark, and a small boat with two figures. The set is made of wood and is suitable for children's play.

AC7529
77pcs Farm Train Set

A detailed wooden farm train set. The set includes a red barn with a red roof, a yellow locomotive, and two green and yellow freight cars. The track is made of light-colored wood and forms a loop around a central farm area. In the center, there is a green field with a white sheep, a pink pig, a brown cow, and a red horse. There are also several green trees and bushes. A small white house with a red roof is located near the barn. A green bridge is over a small stream. A yellow windmill is also present. The set is designed for children's play and is made of high-quality wood.[illegible]

AC7501
80pcs construction train set

A detailed wooden construction train set. The set includes a large yellow and red crane with a blue counterweight. A train consists of a yellow engine and a flatcar carrying a green and yellow truck. The train is on a wooden track that curves around a blue road. On the road, there is a red car and a blue truck. The set also features a yellow building with a red roof, a green slide, a red stop sign, a traffic light, and several green trees. A small figure of a construction worker is also included.
