原料控制

产品所用的油漆、胶水、颜料均采用无毒、无气味的环保涂料，使用前均经专业机构测其合格性，以保证对人体的安全。所用原料均符合欧洲 EN-71 标准、美国 ASTM 认证和FSC森林监管链体系。

安全性控制

为了能更好的把握玩具产品的安全性，集团公司投入了上百万资金，建立了自己的化学和物理检测实验室，并为实验室购买了重金属检测仪器和物理安全检测器材，实验室的设立为我公司提供即时检测，并定期抽检，方便快捷，为玩具安全提供了保障。我公司是木制玩具企业中唯一一家拥有化学检测的企业。

对于新开发的产品，实验室会先自行实验检测，做出检测报告，直到产品检测合格才被投入生产。对于所用油漆、胶水、颜料的供应，我公司会先取样检测，合格后批准采购，并且会定期对所使用的原料进行抽检，以保证原料安全无毒性。

在物理安全方面，实验室同样配备物理检测仪器，对需要投入生产的产品进行测试。公司对设计、工程、生产人员进行培训，让他们熟知玩具安全知识，从一开始的产品研发就保证了玩具产品的安全性。

Raw Material Control

We use non-toxic and odorless eco-friendly coating, glue and pigment on products. Before put into production, they will be test qualified by professional organization to ensure its safety to human body. All of the raw materials we used confirms to EN-71 standard in EU and ASTM in USA and FSC forest regulatory system.

Safety Control

To better control the toys safety, Xinyun Group invested hundreds of millions money to establish independent chemical and physical laboratory and purchased heavy metal detector and physical safety testing equipments for the lab. The laboratory enable us to make immediate testing and regular inspection conveniently and quickly, which provide more guarantee for toys security. Our company is the sole enterprise who can make chemical detection.

For new developed products, the lab will conduct its own test and make test report. The new products won't put into production until it pass the test.

On coating, glue and pigment supply, we will take sample inspection before purchasing, and will conduct regular examination to ensure the materials are safe and non-toxic.

Regarding physical safety, the lab also equipped with physical testing appliances for the products in production. We company also provide training to designers, engineers and production personnel, so that they have a clear mind on toys safety knowledge and ensure products security from the beginning of research and development.

品质保证

玩具虽小，但工艺繁多，每一道工序都是对质量的考验。过硬的产品质量，才可保证产品的竞争力。集团公司有一句深入人心的口号：“产品质量是企业生命线。”十八年集团依靠的一是不断更新的先进设备；二是科学有效的管理措施；三是严格的质量管理体系。次品不出厂，交货不拖期，使得多年来合同履行率达到100%。

选材

选用中国东北部大兴安岭柞木、欧洲榉木、泰国橡胶木、新西兰松木、浙江茴木，最大特点是材质细腻，色泽均匀，硬度适中，耐虫蛀，均为木质玩具上乘选料。木材经过特殊处理，减少产品变形和微生物侵害。

精益求精

在实际生产中杜绝裂缝、裂角，并检验产品的牢固度，产品尖角利边均经过圆角处理，以确保其高安全性。

Quality Assurance

Toy is small, but the process is various, even each process is a test to the quality. Only excellent quality can ensure the competitiveness of the products. Xinyun has a pervasive slogan "Product quality is the lifeline of an enterprise". More than a decade, Xinyun not only relies on continuously advanced equipment, but also depends on scientific effective management and strict quality management system. Rejecting defective products and delayed delivery bring 100% contract fulfillment rate for many years.

Material Selection

We select birch wood from Da Hinggan Ling in the northeast of China, Europe beech wood, Thailand rubber wood, New Zealand pine wood, birch wood in Zhejiang Province. All of the wood with delicate texture, smooth colors, moderate hardness and insect-resistant are considered as superior materials for wooden toys. With special treatment, it can reduce products deformation degree and microbial violation.

Strive for excellence

In actual production, we keep eliminating cracks and initiation angles, inspecting production fastness, treating sharp edges and corners with rounder corner process to ensure its high security.
